CDI ‘Graduates’ from MMIC Business Incubator

New Office Location with 5,500 Square Feet and 30 Employees

Midland, MI – A celebration took place October 30 at MidMichigan Innovation Center (MMIC) as they congratulated representatives from CDI Engineering Solutions, on their ‘graduation’ from the business incubator. The group has relocated to 3086 E. Vantage Point Drive in Midland, into a 5,500 square-foot location complete with space for their 30 employees, with room to continue growing.

Says Chris Moultrup, MMIC Marketing Manager, “MMIC is set up to foster new companies and help them become strong and independent. At that point – *usually within 2-3 years of joining* – these companies are encouraged to spread their wings and “graduate” to an open business setting. We celebrated with CDI Engineering Solutions, and we hold them up as a fine example of coming through our business incubator with success. These graduation ceremonies are a major milestone, and extremely motivating to other tenant companies within the business incubator.”

The graduation luncheon included most of the tenants, board members and others supporters. The MMIC team presented a beautiful award to Dave Angelotti, CDI Engineering manager who expects to display it in their new location.

“We are thrilled to be able to make this move, and to continue our growth. The support and encouragement we received from the team at MMIC really helped us along the way. I’d really recommend the incubator path to others embarking on new ventures,” said Angelotti.

CDI-Process & Industrial provides a full range of engineering, outsourcing and staffing solutions to Fortune 500 companies in two distinct sectors: Process, which includes the hydrocarbons and chemical processing industries, and Industrial, which includes power and energy, telecommunications, and heavy manufacturing. CDI-Process & Industrial has offices located throughout North America and, through strategic partnerships, also delivers projects and high-value engineering solutions throughout Europe and the Far East.

In addition to its core Engineering, Procurement, and Construction Management (EPCM) services, CDI-Process & Industrial also offers a broad array of technical outsourcing, including engineering-focused IT services, tailored to the needs of its customers. In short, CDI-Process & Industrial can manage projects, engineer solutions, source talent, and assume a client's non-core functions – offering process and industrial clients project-specific expertise or a cost-effective, single-source provider to fulfill their multiple needs.
